

Legacy Oil + Gas Inc. is seeking a *full-time*

Senior Reservoir Engineer.

The candidate must have an engineering degree, a minimum of 15 years experience and be completely versed in all aspects of reservoir engineering. Specific expertise in reservoir and fluid characterization, waterflooding, enhanced oil recovery, reservoir simulations, horizontal and fractured well flow modelling and testing/analysis is desirable.

The candidate must have good communication skills, be familiar with technical software, be able to work well within a multi-disciplinary team environment and be able to initiate and direct external services such as core and laboratory studies.

Legacy offers competitive compensation and benefits.

Resumes may be e-mailed to: **info@legacyoilandgas.com**

ATTENTION: Curt Labelle, Vice President, Production

Only candidates of interest will be contacted.

Legacy is a uniquely positioned, well-capitalized intermediate oil and natural gas company with a proven management team committed to aggressive, cost-effective growth of light oil reserves and production in Saskatchewan and Manitoba. Legacy's common shares trade on the TSX Exchange under the symbol LEG.
